

ProCraft Folding Handle Ratchet Loadbinder

Secure and gradually adjust your load with the durable folding handle ratchet loadbinder. It has a heavy duty powder coated barrel with rubber for improved grip, forged handle and hooks, heat treated and proof load tested. The 3 pawl positions allows for a choice of ratchet extension, ratchet take-up or free spin setting for quick adjustments in either direction saving time and reducing stress on the operator's body. The folding handle lets you position it out of the way for increased safety, and can be easily stowed on your cab rack when not in use. Meets or exceeds DOT and CVSA standards. **DO NOT** exceed rated capacities and **NEVER** use handle extenders or "cheater" bars. Built with a 3:1 factor of safety.
